Survey on the Preferences and Satisfaction of Teenagers in Taoyuan District Regarding Money Box KTV and Telephone Booth KTV

For the teenage population, singing after school serves as a channel for stress relief. Apart from the traditional private room karaoke (KTV) establishments, which are popular among enthusiasts, a new type of karaoke has emerged in the form of telephone booth-style KTVs, offering relatively cheaper prices. Therefore, our team aims to investigate and conduct a questionnaire survey on the advantages and disadvantages of Taiwan's private room KTVs and telephone booth-style KTVs to explore satisfaction levels, emotional experiences, and preferences among the teenage demographic.

Research Framework.

The difference between qián guì anddiàn huà tíng KTV
