014226 李羽涵

014235 黃瑋軒

The system we make is an online ordering system. In response to the promotion of environmental protection in modern society and the application of digital technology, reducing the use of written menus and switching to online ordering has become a modern trend. Our website provides restaurant operators with the ability to check order status, manage reservations, upload new menus, and checkout. In terms of customers, we provide online reservation, scan QRcode to order food, and view menu services. In terms of dishes, we also provide main dishes, side dishes, appetizers, drinks, and snacks for customers to enjoy.
