Epidemic and you

FIRST GROUP

Query data and integrate

According to the problem we defined, we searched the available data on the Internet. Although many problems occurred in the middle, for example, the results of the data we finally found were all garbled codes, and we couldn't find the data we wanted.....

Making Charts with Power Bi and Excel

Based on the information found above, use Power Based on the information found above, use Power Bi, Excel and other software to make combination charts and consolidate data, so that we can use the information at hand to present various problems we want to present

What this work wants to express

There are a lot of people on the planet who lost their jobs, found new business opportunities, and made more money because of this wave of epidemics. We want to use this work to show the impact of COVID-19 on various countries around the world and let the world see
