Introduction

香八啡肥

- Versatile Applications, Minimizing Waste Broadening the Scope of Sustainable Development.

As coffee sales increase, the production of coffee grounds also grows gradually, imposing a significant burden on the environment. In response, our team members have decided to transform coffee grounds into scented sachets, fertilizer, and cleaning agents, allowing these seemingly insignificant residues to generate more value.

Product	Usage Instructions
Scented Sachet	Hang the scented sachet up the fragrance will last for approximately 15-20 days.
Fertilizer	Mix with soil and eggshells to decompose into fertilizer.
Cleaning agent	Sprinkle on oily surfaces and gently scrub to remove stains.

Product Features

1. Reduces waste volume with high environmental value
2. Versatile Applications
3. Prevents pests, enhancing crop aesthetics.
